# FutureProof Retail and QVS Software Partner to Power Mobile Checkout

NEW YORK, NY, USA, May 31, 2023 /EINPresswire.com/ -- FutureProof Retail (FPR), a leading provider of mobile checkout solutions for retailers, today announced a partnership with QVS Software (QVS), a leading provider of retail technology solutions. The partnership will provide retailers using QVS' Smart Shopping Services with pre-set option to add FPR's self-scanning mobile checkout. The joint solution allows retailers to offer consumers a frictionless checkout experience connected directly to their point-of-sale (POS) system.-- FPR's solution also integrates with retailers' existing payment processor and loyalty programs, making it easy for retailers to implement and manage. It allows customers to use their smartphones to scan and pay for items, reducing wait times and improving the overall shopping experience.

"We are excited to partner with QVS to provide retailers with an out-of-the-box integration option," said Di Di Chan, President of FutureProof Retail. "Our solution offers a convenient and secure way for customers to shop, while also helping retailers streamline their operations and reduce costs without having to develop their own app and launching a long integration project. With FPR's SDK they can even integrate self-scanning into their existing banner apps."

"The integration of our solutions with FutureProof Retail's mobile checkout technology will allow our clients to offer a truly frictionless shopping experience to their customers," said Lew Ashmore, President of QVS Software, Inc. "Large retailers can now manage all checkout options including cash registers, mobile POS, smart carts, self-checkout kiosks and now also mobile self-scanning using the QVS platform."

About FutureProof Retail
Founded by a group of impatient shoppers and award-winning developers in New York, FutureProof Retail (FPR) links online and in-store shopping through its mobile shopping

solutions. FPR's mobile platform provides retailers with touch-free mobile checkout and order-ahead retail solutions.
