

# Cargo Spectre Dimensioning Software Integrates Seamlessly with HAL's C2C

*Cargo Spectre's freight-data systems integrate seamlessly with HAL's C2C, one of the world's most popular warehouse management softwares.*

HOUSTON, TX, UNITED STATES, May 31, 2023 /EINPresswire.com/ -- [Cargo Spectre](#), a leading innovator in the global [freight dimensioning](#) industry, announced today that its freight-data systems integrate seamlessly with HAL's [C2C](#), one of the world's most popular warehouse management softwares.

Cargo Spectre's freight dimensioning systems integrate seamlessly into HAL'S C2C.

Using sophisticated APIs, Cargo Spectre integrates perfectly with C2C at the local level. No matter how many units or personnel C2C clients add, they can remotely control Cargo Spectre automated dimensioner systems from any terminal using the same C2C screens they used before Cargo Spectre was added to their warehouses.

“

The seamless, plug-and-play experience our software provides helps make Cargo Spectre the the easiest-to-use freight data system in existence.”

*Cargo Spectre CEO Jason Joachim*

The only training Cargo Spectre must provide to C2C clients when their dimensioners are added is teaching warehouse staff how to do less.

“C2C is only one of a multitude of WMS integrations that we offer,” said Cargo Spectre CEO Jason Joachim. “The seamless, plug-and-play experience our software provides helps make Cargo Spectre the the easiest-to-use freight data system in existence, as none of our competitors can

match this capability.”

Cargo Spectre maintains a competitive advantage over other dimensioners thanks to a very convenient innovation. These competitors each offer a number of machines that require a variety of software systems in order to operate. Finding the working translation for each version

of every product a logistics business operate can be a major waste of time and effort for clients. Cargo Spectre's effortless software integrations are designed to eliminate this problem.

"We take pride in offering the only dimensioning solution that can integrate fully and easily with a client's preferred software," Mr. Joachim said. "Our only goal is to speed up throughput while reducing the learning curve for warehouse workers."

For more information about Cargo Spectre's industry-leading freight data systems, please visit [CargoSpectre.com](https://www.CargoSpectre.com).

#### About Cargo Spectre

Cargo Spectre automated dimensioner systems make dimming and weighing an exact science by using A.I. machine learning to accurately process and document thousands of pieces of freight a day with no downtime for maintenance. Our API connects effortlessly and seamlessly to the most popular shipping and warehousing softwares in the world and enables our customers to operate our dimensioners and manage their data with ease.

#### About C2C

Used in more than 320 facilities across six continents, HAL Inc's C2C material management application is a best practice for material management and 3PLs' warehouses, field locations, yards, temporary sites, customer facilities, and key route checkpoints the world over. For more information, please visit [hal-inc.com](https://www.hal-inc.com).
