

Blue Fusion Patent for Federated Searching of Disparate Data is Approved

Patent Approval Validates Game Changing Technology for "One Click", No Code Federated Searches

FAYATTEVILLE, NORTH CAROLINA,
UNITED STATES, May 31, 2023

/EINPresswire.com/ -- [Blue Light](#) LLC received approval from the U.S. Patent and Trademark Office that its patent for federated searching of heterogeneous data sources as approved.

“

This is a tremendous achievement for our company and customers. It validates the years of work we dedicated to addressing critical data connectivity and ingestion gaps that have hindered analysts.”

*Bruce Parkman, Chief
Executive Officer*

[Blue Fusion](#) is a disruptive technology that is focused on two of the largest problems that military, law enforcement and security organizations face: connecting multiple and different data sources and automating the analyst's workflow to search that data and visualize that in a single pane of glass. The patent applies specifically to Blue Fusion's extraordinary ability that allows analysts to search across unlimited databases with one click, saving them 80% of their time and making them more productive than ever. It is completely agnostic at the data source, visualization and storage layers, making it one of the most significant improvements for analysts in decades.

Blue Fusion , which starts at a highly affordable entry point of \$3,000, provides significant value as it also provides a centralized repository for analyst data, geospatial federated searches, as well as scheduled and automated queries and alerts from connected technologies and sensors. The product, coded in the latest languages like ReactJS, comes with a connector marketplace of over 30 cutting edge databases like OSINT Combine, Chainalysis, HYAS, Sayari, Lexis Nexis, TLO Clear, Whooster and more.

“The award of this patent means so much to our company, our engineers and our customers” said Blue Light's Chief Executive Officer, Bruce Parkman. “this validates the years of hard work we have spent addressing the critical gaps in data connectivity and ingestion that have hampered the analyst. We will continue to expand Blue Fusion to address their needs to improve the security of this nation, its citizens and our international partners.”

Blue Fusion is available directly from the company or through its dedicated network of over 100 partners around the world. Please contact us at www.bluefusion.com for more information.

About Blue Fusion

The company's award winning, patented Blue Fusion technology provides federated "no code" search and alerting capabilities and allows technologies to easily connect to any disparate data source so analysts can easily import disparate data into any visualization capability, like [i2 Analyst's Notebook](#) to see their data in a single pane of glass while save up to 80% of their time. Blue Fusion – All Your Data, All The Time www.bluefusion.com

About Blue Light LLC

As the largest reseller and support provider for the i2 Analyst's Notebook portfolio of products in North America, Blue Light specializes in bundled i2 security solutions and cutting-edge technologies to address National Security, violent crimes, fraud, physical security, and risk management problems. The company's patented Blue Fusion technology provides federated search and alerting capabilities and allows technologies to easily connect to any disparate data source so analysts can easily import disparate data into any visualization capability, like i2 Analyst's Notebook to see their data in a single pane of glass while save up to 80% of their time.
