

# Aeterna Ecosystem Goes Live as a Self-Sustaining Blockchain Project

*Audited by Certik and KYC'd by Assure Defi, Utilities Open Beta Starts This Week*

SINGAPORE CITY, SINGAPORE, May 31, 2023 /EINPresswire.com/ -- Aeterna, an ecosystem blockchain project, has officially launched its mainnet after it underwent both Certik audit and KYC conducted by Assure Defi. Being audited by the world-renowned smart contract security audit firm Certik confirms that Aeterna's smart contract is now safe and free from any existing vulnerabilities, providing users with a more secure and reliable network.

Moreover, verifying identities via the Assure Defi KYC platform reinforces the authenticity of the project while protecting users from potential fraud and safeguarding Aeterna's reputation.

Ever since introducing a user-friendly, decentralized, and transparent blockchain platform, the Aeterna team has been continuously developing unique features that significantly improve the user's experience. As of present, Aeterna already has its own native currency, which will be utilized in transactions within the ecosystem in the near future.

One of the upcoming projects that

Aeterna has been closely working on its Web3 Social Media Platform called "Aerea". The platform shall act as a centralized hub where its active members can access all the resources they require, enabling them to perform comprehensive research on various blockchain projects. This platform will include profile pages for both groups and individuals, a long-form discussion forum, the latest news, live streams, launch calendar, merch store, and much more.

The platform will enable users to verify product reviews, thoroughly study the track record of various projects, contact industry leaders for support, network with a like-minded audience, collaborate in developing new blockchain-based products, and learn from expert advice on wallet security.

"We believe that our social media platform will provide an orderly way for blockchain enthusiasts and new investors to conduct effective and efficient due diligence or analysis on projects that interest them," says Aesir, one of the minds behind Aeterna. "Our hope is that it will become a beacon of light in the space, a hub that will foster growth through collaboration and community, and a place that makes investors feel safe—no matter their level of experience."

The Aeterna team had to undergo rigorous checks and balances to come up with a safe platform that would stand out positively amid the competition across the globe.

With these advancements and exciting developments underway, Aeterna remains committed to continuously enhancing its ecosystem, bringing decentralization to the mainstream while ensuring user security and privacy.

#### Utilities Going Live to Open Beta on June 2

On June 2nd, Aeterna will release its much-awaited utilities and enter Open Beta. The four new features include:

1. **Staking Platform:** Rewards made available for Aeterna stakers as per the terms and conditions of staking protocol.
2. **Escrow Service:** It is a third-party service that holds funds or digital assets on behalf of transacting parties until the transaction is completed satisfactorily.
3. **BNB lottery:** A form of lottery where participants use Binance Coin to purchase tickets and stand a chance to win prizes.
4. **Decentralized Coin Exchange:** A platform that allows users to trade and swap without using a central authority, governed by smart contracts on a blockchain.

These new releases are set to provide Aeterna with a more robust and well-rounded platform that covers most aspects of operating a successful blockchain project.

Join Aeterna Ecosystem in their mission towards achieving a more decentralized community-driven and a trustworthy blockchain platform.
