

A quarter of campers work from the campsite, says 2023 Camping Report

Camping information and booking app The Dyrft found that the percentage of campers say they worked remotely while camping showed no decline in 2022.

PORTLAND, ORE., USA, June 1, 2023 /EINPresswire.com/ -- The Dyrft, the No. 1 app for camping information and booking, found that 23.8 percent of campers say they worked remotely while camping in 2022. That statistic is part of the [2023 Camping Report](#) — but it was identical to the work-from-campsite stat from the prior year.

“With return-to-the-office efforts across the country, one might have expected the work-from-campsite rate to decrease, but it stayed level,” says Kevin Long, CEO of The Dyrft. “Work from campsite is here to stay. You can’t put the toothpaste back in the tube, and you can’t put a productive working camper back in the cubicle.”

“

Work from campsite is here to stay. You can’t put the toothpaste back in the tube, and you can’t put a productive working camper back in the cubicle.”

Kevin Long, CEO of The Dyrft

Sarah Smith [ran The Dyrft from their camper van](#) for six months in the latter half of 2021 while crisscrossing the country.

The Dyrft founders Kevin Long and Sarah Smith working from a campsite in Mt. Hood National Forest, Oregon.

Of the thousands of respondents who took part in the survey, 13.4 percent are categorized as avid campers, meaning they took more than 10 camping trips in 2022. That group was found to be nearly two times more likely to have worked from a campsite last year than other campers.

Vanlifers are certainly one of the main groups of people who take their work on the road. In fact, Long and founder

“Remote work doesn't have to be work from home,” Smith says. “As the leading resource and

community for campers, we love it when a member of our fully remote team works from a campsite. It adds energy to our meetings when someone logs on from the side of a lake or the base of a mountain.”

Recent technological advances have made the work-from-campsite lifestyle even easier to attain. SpaceX’s satellite-based [Starlink recently announced](#) it can provide high-speed internet while a vehicle is in motion.

“I find increased productivity when working from a campsite,” says The Dyrt camper Jason Dunne of

Livingston, Texas. “The novelty of designing modern websites with Starlink in the middle of nowhere with solar power may never wear off!”

About The Dyrt

The Dyrt is the only comprehensive camping resource with over 8 million user-generated reviews for RV, cabin, glamping and tent camping. The Dyrt also has the largest collection of campsites including all public, private and free camping areas in the United States. Campers use The Dyrt to book camping, discover new places to camp and get reservations at sold-out campgrounds. With The Dyrt PRO, campers get advanced maps and discounts on camping. The Dyrt is the No. 1 camping app and receives over 30 million visits from campers each year because The Dyrt has it all. www.thedyrt.com
