Basking Achieves SOC 2 Type 2 Certification in Recognition of Security Compliance

Attestation Demonstrates Ongoing Commitment to Data Privacy and Protection

BERLIN, GERMANY, May 31, 2023 /EINPresswire.com/ -- Basking.io, a global leader in real-time occupancy analytics, today announced that it has achieved Service Organization Controls (SOC) 2 Type 2 compliance. Achieving this compliance demonstrates to current and future Basking clients and partners that their data is managed with the highest standard of security and compliance.

"Security is a core value for us," said Eldar Gizzatov, Basking Cofounder and CEO. "Leading enterprises globally trust Basking, so it is crucial for all of us on Team Basking to demonstrate the highest standard of security and compliance for current and future customers, our commitment to protecting our clients' data, and ensuring it is properly stored and secured in the process."

SOC 2 Type 2 certification attests to the trustworthiness of an organization's security and privacy controls

The SOC 2® reporting framework was created by the American Institute of Certified Public Accountants (AICPA) and examines organizational controls over security, availability, processing integrity, confidentiality, and privacy. Basking partnered with the leading independent third-party auditing firm Prescient Assurance to conduct the thorough audit and examination of the company's infrastructure and platform.

"This achievement represents the hard work and unwavering commitment of our entire team," said Olmo Mezger, Basking Cofounder and COO. "It validates that we have effective, enterprise-

level security controls in place for customers' data in the Basking platform."

About Basking
Basking's workplace analytics platform provides actionable insights for occupiers across the real estate industry, with the real-time utilization data necessary to adapt to ongoing changes in the modern workplace. Pairing a fast-to-deploy, highly scalable, and privacy-compliant solution with deep industry expertise, Basking is changing the way organizations manage their portfolios.
