# PageProof extends proofing in ClickUp with a native integration

PageProof's native integration with ClickUp empowers users with game-changing online proofing.

AUCKLAND, NEW ZEALAND, June 1, 2023 /EINPresswire.com/ -- PageProof, the industry-leading online proofing platform for agencies and marketing teams, today announced the general release of their powerful integration with ClickUp. Teams can now access advanced proofing of all their file formats, powerful review tools, and automated approval routing.

PageProof and ClickUp native integration

"PageProof boosts the productivity of marketing and creative teams by working wherever they do," says Gemma Hurst, CEO of PageProof. "Our native integration with ClickUp is a perfect example of how we build new partnerships to ensure teams can access powerful online proofing inside their preferred tools."

ClickUp is a popular project management tool enabling users to plan, track, and collaborate on any kind of project, and specifically offers a comprehensive solution for managing marketing campaigns, design projects, and brand collateral executions across many industries and team sizes.

The PageProof and ClickUp integration brings a powerful review experience, easy sharing of proofs outside of ClickUp, automations for maximum workflow efficiency, and saves users valuable time - by keeping track of all creative proofs in one place.

Key benefits of the ClickUp and PageProof integration include:
1. ClickUp users can access advanced proofing of file formats such as: video, audio, websites, HTML emails and web banners, native Adobe file formats, Microsoft Office files, prototype

designs from Figma, and much more.

2. Reviewers can access powerful review tools such as: comprehensive annotation, easy comparison of versions with compare mode, rulers and gridlines for checking precision, automatic barcode scanning, ColorSep® to preview color separation plates and check ink coverage, and checklists to ensure compliance.
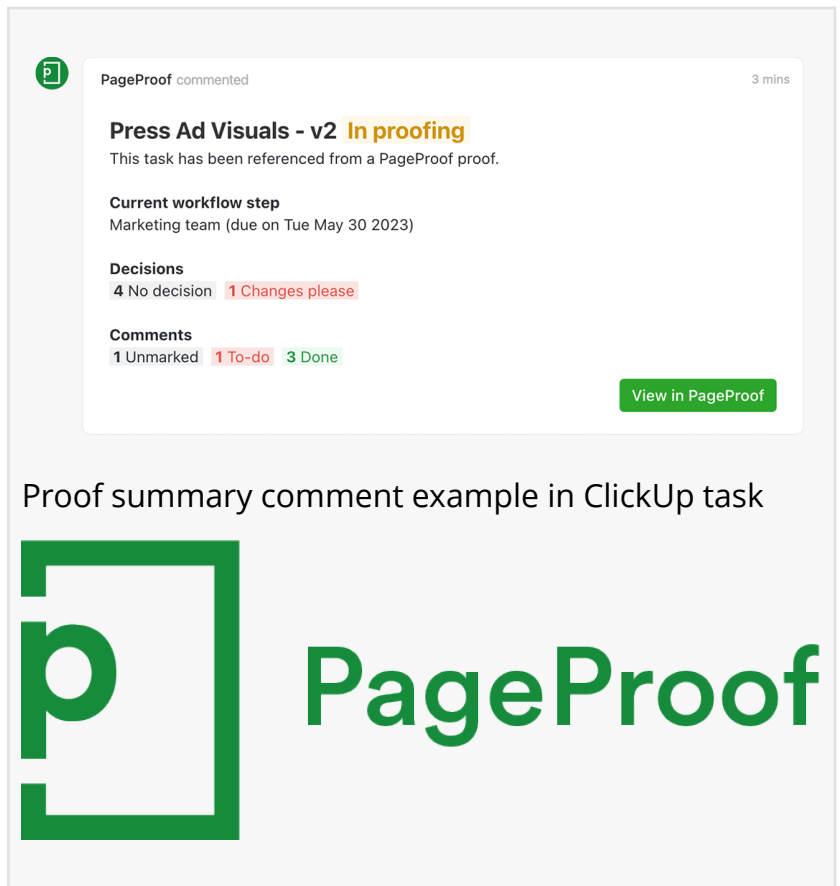

3. Seamless proof creation: Easily create proofs in PageProof and reference them to a ClickUp task.

4. Synchronized task information: ClickUp task custom fields are automatically updated to reflect the proof's lifecycle.

5. Enhanced task visibility: View an information-rich proof summary within the ClickUp task – providing essential proof information at a glance such as: the current workflow step, comment counts, decisions, proof status, and more.

6. Automated file uploads: Approved files in PageProof can be automatically uploaded directly into the corresponding ClickUp task saving effort and time.

Proof summary comment example in ClickUp task

"We're excited to provide ClickUp teams with a powerful collaboration experience for their creative review and approval process," says Marcus Radich, CTO of PageProof. "With this integration, we are taking online proofing inside ClickUp to the next level giving teams online proofing for the full spectrum of files and media that they work with every day, along with specialized review tools."
