The global ecotourism network (GEN) defines ecotourism as "responsible travel to natural areas that conserves the environment, sustains the well-being of the local people, and creates knowledge and understanding through interpretation and education of all involved (visitor, staff and the visited)". Ecotourism is a form of tourism that unites communities, and enables conservation, and sustainable travel. It involves travelling to remote and pristine destinations where the fauna, flora, and cultural heritage are the center of attractions. Recent years have seen increased popularity of eco-tourism around Asia-Pacific and Africa. The rise in preferences among travelers toward the green transport, focus on zero waste, and more interest for unique experience are few of the major Asia-Pacific and Africa ecotourism market trends augmenting the growth.

The tourism industry in these regions is undergoing paradigm shift with increased environmental consciousness among the young and dynamic population in Asia-Pacific. As a result, stakeholders across the industry are promoting natural, unadulterated and pristine destinations to lure tourists. Preserving natural resources along with accommodating large tourists with minimal impact on the environment remains core objective for the engaged stakeholders. The Asia-Pacific and Africa ecotourism market growth is majorly driven by the adoption of technological advancements by the service providers to cater to the demand for digitized services and offerings in the sector.

The rise of travel and tourism to unique destinations has shown significant resilience in Asia-Pacific as well as Africa. India, Kenya, Tanzania, and Nepal are the trending hotspots in unique eco-tourism destinations travelled across. Nepal witnessed a monumental 24% increase in travelers in 2019 recording about 1,173,072 travelers at the end of the year. Similarly, Kenya's 2018 tourist arrivals increased by more than 37% crossing the two million. Furthermore, countries such as Bhutan, Sri Lanka, and Philippines are now becoming main spots for ecotourism. Tanzania has performed competently in the last few years by focusing on niche markets in contrast with the country's historical, natural, and cultural tourism assets.
