## Increasing demand for voice-based payments worldwide

The demand for voice-based payments is increasing worldwide. Voice commands are so much easier than typing in a credit card number at the grocery store, which can take up to five seconds. People are more willing to use their voice for purchases because it is an easy way to pay and there is no need for customers to be connected to the internet or need any additional hardware or software.

## Rising penetration of mobile phones across the world

The increasing penetration of mobile phones across the world is a result of technological advancements and the need for instant access to information. Mobile phone networks and wireless technologies provide global access to high-speed internet and email, allowing people to keep in touch with others and stay informed on any news or upcoming events. Furthermore, with so many applications available, it's now possible for people to use their phones as a replacement for all other devices such as cameras, calculators, schedule organizers and more.
