

Contaminated Water Can Lead to Illness

Eastern Water and Health warns that contaminated water can lead to illness and in rare cases, death, highlighting the importance of proper water treatment.

PORT ST. LUCIE, FLORIDA, UNITED STATES, June 2, 2023 /EINPresswire.com/ -- [Eastern Water and Health](#), a leading provider of [water treatment services](#) in the area, is raising awareness about the dangers of drinking untreated, contaminated water. According to the World Health Organization, contaminated water is responsible for numerous diseases and can even lead to death.

The team at Eastern Water and Health is urging residents to be vigilant about the [quality of drinking water](#). "Many people take clean water for granted, but the truth is that even in developed countries like the United States, there are still instances of water contamination," says a spokesperson for the company. "While many residents drink city water that has been treated for such bacteria and contaminants, many get water from personal wells."

Contaminants in water can come from a variety of sources, including natural minerals and man-made pollutants. Some of the most common culprits include bacteria, viruses, pesticides, and heavy metals. Exposure to these contaminants can cause a range of health problems, from minor stomach upsets to serious illnesses like cholera and typhoid.

All well water should be treated prior to consumption. Eastern Water and Health offer a range of services to help ensure that well-water residents have access to clean, safe drinking water. The company's team of experts can perform basic in-home water tests, send your water out for testing if needed, recommend appropriate treatment methods, and install and maintain water treatment systems to effectively remove contaminants. This company also offers regular water testing to ensure that water quality remains high.

In addition to their services for residential customers, Eastern Water and Health also provides

Eastern Water and Health

water treatment solutions for businesses and industries. "Clean water is critical for many businesses, including those in the food and beverage industry and healthcare," says the spokesperson. "We work closely with our commercial clients to ensure that their water meets all necessary standards and regulations."

Eastern Water and Health is committed to promoting awareness about the importance of clean water and helping residents and businesses access it. "We believe that everyone deserves access to clean, safe drinking water," says the spokesperson. "It's not just a matter of convenience, it's a matter of public health."

Residents and businesses on the Treasure Coast can trust Eastern Water and Health for all their water treatment needs. With its expertise and commitment to quality, the company is helping to ensure a healthier future for the community.
