

Weapon Tripods : Stability, Versatility, and Tactical Advantage

OREGAON, PORTLAND, UNITED STATES , June 5, 2023

/EINPresswire.com/ -- The global weapon mount market will grow significantly in upcoming years owing to the increase in demand due to modernization plans of countries for their forces. Weapon mount is an assembly which is use to hold a weapon such as guns, snipers etc. Weapon mounts are of two types which are static mount and non-static mount. Static mount is either directly mounted on the ground or fitted with the vehicle, whereas non-static weapon mount is portable, that is, it can change its position (axis), revolve etc. Non-static weapon mount includes tripods. Tripods are mainly used for heavier weapons such as machine guns, where the weight would be an encumbrance.

Weapon Tripods

Increase in use of machine guns, increase in terrorist activities across the globe, and arms race between countries are the factors which drive the global [weapon tripods market](#). However, reduction in military budget is expected to hamper the growth of the weapon tripod market. Increasing applications of weapon tripods in naval ships (Destroyers, Frigates, Corvettes, etc.) are opportunistic for the key players operating in the global weapon tripods market.

The use of machine guns has been increased in recent times to provide suppressing fire. For instance, in February 2019, Indian army planned to procure 44,000 light machine guns (LMGs) to deploy over Indo-Pak border. Machine guns are included in the category of heavy weapons and are capable of firing long continuous bursts of fire, which are essential in military operations. However, due to their heavy weight, machine guns also cost recoil (less accuracy). Such issue can be resolved with the use of tripods. Tripods are used on machine in order to provide forward

rest (allows operator to rest the weapon on the ground), which results in increased accuracy as weapons feel lighter to operator. Hence, increase in the use of machine guns will create significant demand of weapon tripods and thereby will contribute in the growth of the weapon tripods market.
