Non-alcoholic spirits can be produced with ingredients

such as fruits, herbs, seeds, juices, extracts, herbs, barks, among others. They are blended together to produce aromas, color, taste notes, and warmth that the producer is trying to achieve. The essence of these ingredients is extracted, transformed and refined in a variety of ways before blending and bottling.

The global non-alcoholic spirits market is anticipated to witness significant growth during the forecast period owing to health benefits associated with the consumption of non-alcoholic spirits

and increase in disposable income. The increasing product launches with innovative ingredients, creating new growth opportunities for the market. On the other hand, Asia-Pacific is expected to show growth in the demand for organic non-alcoholic spirits during the forecast period.

The increase in demand for non-alcoholic alternatives among e-commerce channels and high inclination towards online shopping are major non-alcoholic spirits market trends. Manufacturers are collaborating with e-commerce channels such as Amazon, Walmart, Tesco, among others to be able to reach more consumers.

According to the non-alcoholic spirits market analysis, the market is segmented on the basis of product type, category, distribution channel, and region. By product type, the market is segmented into whisky, rum, vodka, tequila, and others. On the basis of category, the market is classified into conventional and organic. The whisky non-alcoholic spirits accounted for the largest non-alcoholic spirits market share, in terms of revenue, in 2021 as it is the most popular type of alcoholic alternative preferred among consumers. This segment is projected to dominate during the forecast period, and the market is anticipated to show significant growth in Asia-Pacific, whereas growth will remain steady in Europe.

Organic category segment witnesses a major growth in the market owing to the increasing demand for organic food & beverage products among consumers. Organic products are free from chemical fertilizers and any residues of it. During the entire process of farming from sowing to harvesting biofertilizers such as manure and compost are used to produce the food having highest nutritional content.

Food retail segment holds the largest share, in terms of revenue, and is expected to grow at a CAGR of 8.84% during the forecast period. Food retail distribution channel is further bifurcated into store-based and non-store-based, among non-store-based distribution channel witnesses highest growth rate. Online stores are widely accepted by consumers in the developed countries of North America and Europe, due to rise in adoption of mobile phones and increase in penetration of internet. Non-alcoholic spirits can be conveniently sold through online stores. Rigorous online marketing supplemented with huge options, availability of detailed information, discount & free home delivery offered by various e-commerce platforms have increased the popularity of this distribution channel in the recent years. Furthermore, the industry is witnessing a significant growth in developing economies, owing to increase in internet penetration. Therefore, the online stores segment is expected to grow at the highest rate during

the forecast period, and is projected to boost the growth of the non-alcoholic spirits market.
