

# Electrophysiology (EP) Market Projected to Reach \$22.651 Billion by 2030, Report Reveals

*EP industry provides an in-depth analysis of the current trends & future estimations.*

PORTLAND, OREGON, UNITED STATES, June 8, 2023 /EINPresswire.com/ -- EP market was valued at \$6.499 billion in 2020, and is estimated to reach \$22.651 billion by 2030, growing at a CAGR of 14.4% from 2021 to 2030. Electrophysiology is defined as the branch of science that deals with the study of electrical pathway associated with heart nervous system.

Electrophysiology devices are designed to measure electric current or voltage change on a wide range of scale from single ion channel protein to organs such as heart. The electrophysiology procedure is used to analyze heart's electrical system and to manage abnormal heart rhythms.

The EP market segment encompasses various products and services, including:

**Electrophysiology Catheters:** These are thin, flexible tubes used to navigate through blood vessels and deliver energy to specific areas of the heart. Different types of catheters are available for mapping, ablation, and other EP procedures.

**Electrophysiology Recording Systems:** These systems are used to record and analyze electrical signals from the heart during EP procedures. They include amplifiers, data acquisition units, and

software for data analysis.

**Electrophysiology Mapping Systems:** These systems provide detailed 3D maps of the heart's electrical activity, helping physicians locate and identify the source of abnormal rhythms. They often integrate with catheters and recording systems for real-time mapping.

**EP Ablation Generators:** These devices deliver energy, such as radiofrequency or cryotherapy, to create controlled lesions or destroy abnormal heart tissue responsible for arrhythmias. Ablation generators typically work in conjunction with EP catheters.

**Diagnostic Electrophysiology Devices:** These include devices like Holter monitors, event recorders, and implantable loop recorders used to diagnose and monitor arrhythmias and other heart rhythm disturbances over an extended period.

**EP Laboratory Equipment:** EP labs require specialized equipment, such as fluoroscopy systems, intracardiac echocardiography (ICE) systems, and robotic navigation systems, to support various procedures and interventions.

**EP Services:** This includes the professional services provided by electrophysiologists and healthcare facilities specializing in EP procedures, including diagnosis, treatment, and follow-up care.

Global Electrophysiology Market Research Report: Key Findings and Insights

- Which are the driving factors responsible for the growth of market?
- Which are the roadblock factors of this market?
- What are the new opportunities, by which market will grow in coming years?
- What are the trends of this market?
- Which are main factors responsible for new product launch?
- How big is the global & regional market in terms of revenue, sales and production?
- How far will the market grow in forecast period in terms of revenue, sales and production?
- Which region is dominating the global market and what are the market shares of each region in the overall market in 2023?
- How will each segment grow over the forecast period and how much revenue will these segments account for in 2030?
- Which region has more opportunities?

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of the domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
