

Diabetic Socks Market 2022 Current Trends, Rising Demand and Top Key Players - PediFix, Cupron, Thorlo Inc., Reflexa

Increasing prevalence of diabetics and related complications, such as Diabetic Foot Ulcer (DFU) and diabetic neuropathy.

VANCOUVER, B.C, CANADA, June 9, 2023 /EINPresswire.com/ -- Since diabetes is becoming more commonplace in the world, the market for [diabetic socks](#) has experienced substantial expansion. Individuals with diabetes can feel comfortable and safe in diabetic socks, which also help to prevent a number of issues that might arise from the disease. To reduce the danger of infections and foot problems, these socks are designed from specialised fabrics that provide more cushioning, moisture-wicking capabilities, and seamless construction. They are essential in treating diabetic patients' foot health and enhancing their general quality of life.

“

Diabetic Socks Market Size – USD 344.80 Million in 2021, Market Growth – at a CAGR of 4.8%, Market Trends – Introduction of innovative smart sock technology”

Emergen Research

The increased prevalence of diabetes is one of the major factors boosting the market for diabetic socks. According to the most recent analysis by Emergen Research, the global market for diabetic socks had a value of USD 344.80 million in 2021 and is predicted to grow at a rate of 4.8% during the projected period. Diabetics need special footwear to preserve foot health and avoid issues including foot ulcers, neuropathy, and poor circulation, which is driving up the need for diabetic socks among the

expanding diabetes population.

Additionally, a crucial element driving market expansion is the rising awareness of the need for preventative measures and diabetic foot care. The use of diabetic socks as a crucial part of diabetes management has been vigorously promoted by governmental organisations, medical experts, and diabetic societies. These programmes seek to inform people about the advantages of wearing diabetic socks and stress the value of early intervention to prevent issues related to the feet.

The primary aim of the report is to offer market overview, product scope, growth prospects, and risks. The report also offers in depth information about each player in the global Diabetic Socks market along with its global standing, financial status, product launch, business expansion plans among others. The market players are focused on developing various strategies such as partnerships, mergers and acquisitions, joint ventures, product launches, and research and development investments.

Key Companies Profiled in the Report:

Apex Foot Health Industries, SIGVARIS, Siren, HangZhou Aidu Trading Co., Ltd., Soyad Brothers LLC., DJO, LLC, PediFix Inc., Cupron, Thorlo Inc., Reflexa, and BSN Medical.

Some Key Highlights From the Report

In 2021, the copper market contributed a modest portion of total revenue. Copper-infused socks also prevent odour and the spread of athlete's foot when worn repeatedly. As soon as they come into contact, bacteria, viruses, and fungi that cause skin conditions or unpleasant odours are successfully eliminated by copper's antibacterial capabilities. Copper-impregnated fabric also promotes the creation of new skin cells, which hastens wound healing and provides protection against infections.

In terms of revenue share in 2021, the retail shops segment contributed significantly. This is a result of offline retailers offering a wide range of options for hair care products and promoting both branded and private label goods. By allowing clients to choose from a choice of brands, retail outlets provide them the freedom to make decisions. Customers can discuss different items with owners and staff of retail enterprises to get useful information. If clients prefer an effective purchasing process to internet browsing, retail store owners and workers may be able to assist them in making the best choice, which may be more convenient for them.

In terms of revenue share in 2021, the Asia Pacific region accounted for a sizeable portion. The diabetic socks market is expanding in this region, especially in India, Japan, and China, as a result of rising diabetes prevalence among the populace, particularly among the ageing population, as

well as rising textile imports and exports for hosiery products, including diabetic socks, for the provision of diabetic socks, particularly in China and India. For instance, the global hosiery market, which comprises socks, pantyhose, tights, compression hosiery, and stockings, is expected to grow in 2021, according to International Markets for Hosiery.

Major Geographies Analyzed in the Report:

North America (U.S., Canada)

Europe (U.K., Italy, Germany, France, Rest of EU)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

Additional information offered by the report:

Along with a complete overview of the global Diabetic Socks market, the report provides detailed scrutiny of the diverse market trends observed on both regional and global levels.

The report elaborates on the global Diabetic Socks market size and share governed by the major geographies.

It performs a precise market growth forecast analysis, cost analysis, and a study of the micro- and macro-economic indicators.

It further presents a detailed description of the company profiles of the key market contenders.

What Questions Should You Ask before Buying a Market Research Report?

How is the Diabetic Socks-market evolving?

What is driving and restraining the Diabetic Socks market?

How will each Diabetic Socks submarket segment grow over the forecast period and how much revenue will these submarkets account for in 2030?

How will the market shares for each Diabetic Socks submarket develop from 2022 to 2030?

What will be the main driver for the overall market from 2022 to 2030?

Will leading Diabetic Socks markets broadly follow the macroeconomic dynamics, or will individual national markets outperform others?

How will the market shares of the national markets change by 2030 and which geographical region will lead the market in 2030?

Who are the leading players and what are their prospects over the forecast period?

What are the Diabetic Socks projects for these leading companies?

How will the industry evolve during the period between 2020 and 2030? What are the implications of Diabetic Socks projects taking place now and over the next 10 years?

Is there a greater need for product commercialisation to further scale the Diabetic Socks market?

Where is the Diabetic Socks-market heading and how can you ensure you are at the forefront of the market?

What are the best investment options for new product and service lines?

What are the key prospects for moving companies into a new growth path and C-suite?
