Fitness equipment are widely used for physical fitness, weight management, and improving body stamina & muscular strength. The commonly used fitness equipment are treadmills, stationary bicycles, stair climbers, and weightlifting machines. Rise in awareness regarding health & fitness, increase in obese population, government initiatives to promote healthy lifestyle, and increase in youth population are the major factors that drive the growth of the global fitness equipment market. However, counterfeiting of fitness equipment is a key restraining factor of the market. On the contrary, upsurge in youth population, improved lifestyle, and rise in disposable income of individual in developing countries are anticipated to offer immense opportunities for the market players.

An alarming rise in global obesity, especially in urban areas, supplements the growth of the fitness equipment market. According to the WHO, there has been a startling increase in the number of obese people worldwide. In 2020, world's 39% of adults aged 18 years and above were overweight and 13% were obese. Obesity is associated to a number of health issues or disorders such as sudden cardiac arrest, hypertension, hypotension, and diabetes.

Therefore, to lose weight, reduce stress, and improve blood circulation, obese people tend to use more of fitness equipment, thereby increasing the sales for these products. The global fitness equipment market is segmented into type, end user, and region. Depending on type, the fitness equipment market is categorized into cardiovascular training equipment, strength training equipment, and other equipment.

By end user, the market segregated into health clubs/gyms, hospitality, residential, & leisure (Hotels, Residential, and Leisure Clubs), health, corporate, public (Hospitals & Medical Centers, Corporate Offices, and Public Institutions), and home consumer. By price point, the market is segregated into premium/luxury and mass. Each of the segments in end user and price point are further categorized into cardiovascular training equipment, strength training equipment, and other equipment.

On the other side, the manufacturers and e-commerce platforms are focusing towards more innovative and effective fitness products to serve the home users.

The trends for online fitness training are growing rapidly and impacting consumers inclination toward purchasing new fitness equipment at home. According to the report published by MindBody 2020, the online booking for online yoga and fitness training has increased by 30% in the year 2020. The rising awareness of such virtual trainings among the people has boosted the sales of home fitness equipment worldwide.

By type, cardiovascular training equipment segment accounted for the major market share and is poised to grow with a significant CAGR during the analysis period. The market has witnessed entry of various new players such as RFE International, which is a licensee of Adidas. It has launched its array of exercise bike, treadmill, and cross trainers in the market.
