

# BIOHIT Launches New Quick Test to Help Streamline Gastroscopy Referrals

ST NEOTS, CAMBRIDGESHIRE, UNITED

KINGDOM, June 15, 2023

/EINPresswire.com/ -- BIOHIT

HealthCare Ltd will be attending the upcoming BSG Live 2023 conference in Liverpool, where it will unveil a revolutionary new test to support decision making for gastroscopy referrals and improve the early detection of gastric cancer. The GastroPanel® Quick Test diagnoses Helicobacter pylori infection, atrophic gastritis (AG) – a precancerous condition – and high gastric acid output in just 15 minutes, helping to triage patients in primary care and promote early discovery and treatment of gastrointestinal disorders.

The rapid, non-invasive test can be performed on a finger-prick blood sample during a clinical appointment to investigate H. pylori infection and three stomach-specific biomarkers; pepsinogen I, pepsinogen II and gastrin-17. The easy-to-use test can detect AG with comparable accuracy to the current gold standard methods, gastroscopy and histology, at a fraction of the cost. Detecting AG earlier in the diagnostic pathway will help to identify patients at risk of developing gastric cancer, leading to improved prognosis as well as refining the selection of patients that require further examination. This can alleviate the strain on gastroscopy services, triaging those most in need of specialist investigation and identifying patients that can be treated within primary care.

Studies have shown GastroPanel to be highly reliable in the diagnosis of AG, with a sensitivity of 74.7 per cent and a specificity of 95.6 per cent. The test also demonstrates negative and positive predictive values of 91 per cent and 86 per cent, respectively. On top of this, data suggests that non-invasive screening using pepsinogens in the over 50s reduces the lifetime risk of some types

GastroPanel® Quick Test is a rapid and non-invasive diagnostic tool, transforming gastroscopy referrals and detecting gastric cancer risk early.

of gastric cancer by 26.4 per cent,<sup>1,2</sup> confirming the potential of GastroPanel for improving patient outcomes through early identification of high-risk individuals.

Graham Johnson, Managing Director at BIOHIT, commented: "We are incredibly excited about the launch of the GastroPanel Quick Test across the UK. This ground-breaking test will assist GPs in the care of their patients, helping them to confidently rule out AG and make informed decisions on who to refer to secondary care for gastroscopy. This is a cost-effective solution for the healthcare system that will also help endoscopy services apply the resources they have to those who need them, so that gastric cancer and significant disease can be found earlier on."

#### About BIOHIT HealthCare Ltd

BIOHIT HealthCare Ltd ([www.biohithealthcare.co.uk](http://www.biohithealthcare.co.uk)) is part of the Finnish public company, BIOHIT OYJ, which specialises in the development, manufacture and marketing of products and analysis systems for the early diagnosis and prevention of gastrointestinal diseases. The company's many unique and patented diagnostic tests transform clinical practice and make screening, diagnosis and monitoring of gastrointestinal diseases efficient and cost effective. Non-invasive diagnostics are at the core of BIOHIT's offering, making it the provider of choice for leading gastroenterologists and laboratory scientists worldwide.
