A Web Security Gateway is a type of security solution that prevents unsecured traffic from entering an internal network of an organization. It is used by enterprises to protect their employees/users from accessing and being infected by malicious Web traffic, websites and virus/malware. Web Security Gateways were generally appliance-based security solutions to prevent advanced threats, block unauthorized access to systems or websites, stop malware, and monitor real-time activity across websites accessed by users within the institution. Software and cloud-based platforms now perform this function as well.

Browse market information, tables, and figures extent in-depth TOC on Web Security Gateway Market by Application (SME (Small and Medium Enterprises) & Large Enterprise), by Product Type (Physical Appliance, Virtual Appliance & SaaS), Business scope and Outlook – Estimate to 2029.
