

Industry Experts Praise CoreMelt Detonators Plugin Set for Final Cut Pro

New plugin set brings powerful paint, tracking and 3D tools to all users of Final Cut Pro on Apple Silicon and Intel Macs.

SYDNEY, NEW SOUTH WALES, AUSTRALIA, June 14, 2023 /EINPresswire.com/ -- [CoreMelt](#), the leading provider of advanced video plug-in effects for Final Cut Pro, released the [Detonators](#) plugin pack at NAB 2023. Since then, industry experts have been quick to praise the advanced tools and power of the new plugin set. The Detonators plugin set integrates seamlessly with Final Cut Pro's built in tools, adding new ways to work with tracking, paint, 3D models, AI styles, and other visual effects.

“

Detonators is worth the price just for PaintX, it's so easy to do cleanups. We also use the screen replace tools constantly, for covering up signs or logos or anything else we can't have in shot”

Che Baker

Alister Robbie, Director and editor from The Post Project, explains: “When Final Cut's built in tracking fails, the CoreMelt tools have always saved me, and the paint tools are indispensable for quick touch ups and fixes. We use

CoreMelt tools in almost every project”.

Roger Bolton, Founder and Product Director at CoreMelt, adds: “We always try and work closely with creatives like Alister during our product development process to make sure the tools really work for the real world tasks and to simplify the steps so you can do everything on the timeline in minutes”.

The Detonators plugin set includes eight powerful products.

[PaintX](#) - draw paint strokes and track them instantly with flexible clone and heal tools.

Lock & Load - the fastest, most powerful stabilizer for Final Cut.

ModelX - load and add logos to 3D objects, right on the timeline.

SliceX - track masks for color correction, blurs, glows and visual effects

TrackX - quick screen replacements, or sign coverups with planar tracking

DriveX - tracked particles, 3D text, callouts and 3D models.

StyleX - AI video style transfer grunge effects

LUTx - powerful LUT loader with interactive gallery to see your LUTs on your footage instantly.

One of the first to take CoreMelt Detonators through its paces, Director/Producer Che Baker of Full Point Films gave the new plug-in set high marks: "Detonators is worth the price just for PaintX, it's so fast and easy to do cleanups. We also use the screen replace tools constantly, for covering up signs or logos or anything else we can't have in shot".

Great Guns Director Remo Camerota adds "The stabilizer has saved shots nothing else could fix, and the animated paint strokes created super fast visual effects for several music videos. In terms of Final Cut Pro plugins, these are the best". CoreMelt's Roger Bolton sums up: "This is just the start. We will be adding to Detonators and having more new products coming soon."
