Advancements in big data technology, emphasis on collecting & using data for decision making, and a surge in reliance on machine learning drive the growth of the global data science platform market. However, high investment cost and issues related to data privacy, security, & reliability hinder the market growth. On the other hand, surge in adoption of cloud-based solutions & services present new opportunities in the coming years.

Data science platform market is segmented on the basis of component, application, industry vertical, and region. On the basis of component, it is divided into platform and services. On the basis of application, it is divided into marketing & sales, logistics, finance and accounting,

Data Science Platform

customer support, and others. According to the industry vertical, it is segmented into BFSI, IT & telecommunication, retail & E-Commerce, healthcare, transportation, manufacturing and others. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Covid-19 Scenario:

□ Various organizations adopted the work-from-home culture due to lockdown measures. This created the demand for data science platforms to manage critical information of organizations. This presented lucrative opportunities for market growth.

□ Moreover, governments in numerous countries adopted data science to avail real-time data on coronavirus cases and gain actionable insights from the data.
