Mobile wallet is an on-going popular trend and has revolutionized the concept of universal commerce. Consumers are always pleased for getting an integrated buying experience that is fast, secure, consistent service that is available at any location, anytime, and via any device. This is what mobile wallet has given to its consumers with additional benefits of track records. Also, the mobile wallet promoters state that a mobile wallet is more advantageous than cash, check, or card payment counter parts as it facilitates an all-in-one payment solution for consumers; they do not have to carry paper or plastic for payment. This is a major factor that drives the global mobile wallet market growth during the forecast period.

Moreover, mobile wallets provide easy and personalized shopping experiences to its consumers by storing locations and purchase history in the cloud, with its smart location tracking feature. In addition, it is also equipping vendors / retailers with the chances to promote their products / services effectively and enhances the loyalty factor, which in turn has proliferated the adoption of mobile wallet among retailers across the globe, which in turn has supported the growth of the mobile wallet market.

By type, the remote payment method dominates the mobile wallet market share in 2019. This is attributed to significant reach of the remote payment methods and relative infancy of Near Field Communication (NFC) technology. The number of consumers using their tablets and smartphones as their regular Internet gadget is increasing tremendously. In addition, a mobile wallet supporting remote payment transactions allows unbanked / under-banked consumers to make use of mobile commerce through their mobile computing devices.

Key Findings Of The Study

By type, the remote segment dominated the mobile wallet market trends. However, the proximity segment is expected to exhibit significant growth during the forecast period. By technology, the QR code segment dominated the mobile wallet market share in 2019. However, the near field communication segment is expected to exhibit significant growth during the forecast period.
