Definition:

Hosted PBX (Private Branch Exchange) is a cloud-based phone system that allows businesses to make and receive calls through the internet instead of traditional phone lines. Hosted PBX systems are typically managed and maintained by a third-party provider, which eliminates the need for businesses to purchase and maintain expensive hardware and software. Hosted PBX systems offer a range of features and benefits, including cost savings, scalability, flexibility, ease of management, and advanced call features such as call forwarding, voicemail, and call recording. Hosted PBX is a popular alternative to traditional on-premises PBX systems, as it enables businesses to enjoy the benefits of an advanced phone system without the need for significant capital expenditure or ongoing maintenance costs.
