

Injection Moulding Manufacturer, Mars Plastics, Celebrates 25 Years of Excellence

Providence, RI - Mars Plastics, a prominent injection molding plastic manufacturer located in Providence and Cranston, Rhode Island is thrilled to announce its milestone 25th anniversary. For the past quarter-century, Mars Plastics has been a trusted name in the industry, providing reliable, economic, and versatile plastic injection molding services with impeccable customer satisfaction.

Mars Plastics specializes in custom injection molding for a wide variety of industries, including medical, automotive, and consumer goods. The company offers a wide range of services, including design, prototyping, tooling, and manufacturing. They are an approved manufacturer for Walmart and Target, and are proud to be an approved manufacturer for U.S. Military medal presentation cases.

With over 50 years of collective moulding experience, Mars Plastics has solidified its position as one of the largest injection molders on the east coast. As a family-owned business, Mars Plastics combines generations of knowledge with a passion for delivering exceptional results. The company welcomes clients of all sizes, from small inventors with innovative ideas to major corporations seeking high-quality plastic manufacturing solutions.

Mars Plastics' dedication to excellence is reflected in its state-of-the-art 100,000 square foot plastic manufacturing facility located in Providence, Rhode Island. Operating round the clock, the facility boasts a vast array of 40 injection moulding machines ranging in size from 12 tons to 720 tons, with shot capacities of up to 120 ounces. This impressive machine range enables Mars Plastics to produce some of the largest parts in the industry, accommodating various production requirements such as multi-cavity small parts production, over-molding, insert molding, and two-color molding.

As a forward-thinking company, Mars Plastics embraces work cell manufacturing practices, incorporating assembly, decorating, and packaging into its projects. This approach ensures efficient and cost-effective manufacturing, granting Mars Plastics a competitive edge in the market. The company's commitment to utilizing robotic technology and high-quality equipment guarantees production quality, speed, and consistency, reinforcing its reputation as a reliable partner for injection moulding needs.

Moreover, Mars Plastics takes pride in its expertise in gas assist injection molding, offering machines with capacities of 800, 1000, 1200 tons, and up to 180 ounces. This process enhances the strength and rigidity of parts through the creation of tubular structures, allowing for weight reduction and design flexibility while achieving superior surface finishes.

"At Mars Plastics, we are thrilled to celebrate our 25th anniversary," said K. Jason Krikorian, President at Mars Plastics. "We owe our success to our valued customers, dedicated team, and

unwavering commitment to delivering top-notch injection moulding services. As we look ahead, we remain dedicated to pushing the boundaries of innovation, meeting the evolving needs of our clients, and upholding our reputation as a reliable industry leader. We truly look forward to growth and servicing new markets in 2023/2024."
