*Spirulina market was valued at \$393.6 million in 2019, and is projected to reach \$897.61 million by 2027, registering a CAGR of 10.5% from 2020 to 2027.*

PORTLAND, OR, UNITED STATES, June 21, 2023 /EINPresswire.com/ -- The Global [Spirulina Market](#) garnered \$393.6 million in 2019, and is expected to reach \$897.61 million by 2027, witnessing a CAGR of 10.5% from 2020 to 2027. The report provides an extensive analysis of changing market dynamics, key segments, value chain, top investment pockets, regional landscape, and competitive scenario.

Increase in demand for natural ingredients, supportive government initiatives for production of spirulina, and R&D activities to promote spirulina as commercial products drive the growth of the global spirulina market. However, impact on production due to climate change hinders the market growth. On the other hand, untapped potential in developing countries and ease in cultivation due to development in technology create new opportunities in the coming years.

The demand for spirulina increased during the Covid-19 pandemic as the focus on nutritional content rose. Researchers also focused on finding a possible role of algae in delaying the onset of Covid-19.

In addition, various studies have been carried out to determine potential of seaweed to fight Covid-19 by the organizations such as the World Health Organization (WHO).

Despite the increase in demand, there were hindrances in supply chain due to lockdown imposed by governments in many countries. The supply chain is expected to get back on track during the post-lockdown.
