

Executive Global Magazine Features Canadian MedTech Pioneer, Pierre Lemire, on Cover with an Exclusive Interview

Kent Imaging CEO, Pierre Lemire, speaks about entrepreneurship and how imaging technology and the rise of AI are changing the healthcare industry.

CALGARY, AB, CANADA, June 21, 2023

/EINPresswire.com/ -- Kent Imaging's CEO, Pierre Lemire, is featured on the cover of Executive Global's Spring issue. Executive Global offers a unique insight into the state of global business in the contemporary age, bringing together the most renowned business personalities and economists of the modern era. The magazine delivers the statistics, strategy, and foresight required to make informed business decisions within the global marketplace.

In his exclusive interview, Mr. Lemire speaks about the journey of entrepreneurship and his passion for fostering innovations in healthcare in Canada and beyond. As the force behind pushing Kent Imaging's near-infrared imaging device (SnapshotNIR) into global markets, Lemire speaks to the importance of these technologies in reducing healthcare costs and complications for patients. "The technology we are developing is changing how clinicians treat acute and chronic wounds with actionable insights they never had before," explains Lemire.

When asked about the most up-and-coming advancements in MedTech, Mr. Lemire addresses the topical subject of artificial intelligence (AI) and machine learning (ML). He states, "AI and ML algorithms allow early detection of disease, personalized treatment plans, and reduced healthcare costs." He adds, "It is important to note that these technologies are not a replacement for human expertise and clinical judgment, but rather a tool to enhance the quality and efficiency of medical imaging. It allows clinicians to improve their evaluation and diagnostic skills."
