

Jatheon Technologies Introduces Geofencing Options for Data Archiving

Jatheon Technologies Inc. is announcing geofencing as an additional method of improving data security for organizations in regulated industries.

TORONTO, ONTARIO, CANADA, June 22, 2023 /EINPresswire.com/ -- Jatheon Technologies Inc., a tech company specializing in [data archiving](#), search, and ediscovery, is announcing the introduction of geofencing as an additional method of improving data security for organizations in regulated industries.

Geofencing is utilized to establish virtual perimeters around a desired geographic area, such as a country, state, or region. Depending on the country's specific data localization and data residency requirements, organizations may require that their email archive be stored and processed exclusively within the specified region.

Jatheon's CEO, Marko Dinic, explains: "We placed a special emphasis on making our cloud solution, [Jatheon Cloud](#), as secure as possible, starting from using AWS as the top-rated cloud infrastructure service provider. Our system is fully scalable, with 22 AWS microservices, fully encrypted data at rest and in transit, and two-factor authentication. In addition to that, Jatheon Cloud is multi-zone redundant and we also provide geofencing options around the world.

Some organizations operate in countries with very strict data localization regulations, so geofencing ensures that their data remains within the designated boundaries, reducing the risk of potential legal and compliance issues."

compliance, and ediscovery, visit <https://jatheon.com/products/cloud-email-archiving-solutions/>.

ABOUT JATHEON

Jatheon Technologies Inc. was founded in 2004 to empower companies in their efforts to ensure email compliance and facilitate eDiscovery.

Today, Jatheon is a leader in the archiving industry, with 11+ billion processed messages and unique cloud and on-premise archiving solutions. In 2018, the company launched Jatheon Cloud – the next-generation cloud email archiving solution. In 2019, Jatheon launched Jatheon Archive, an email archiving and management mobile app that supports both Jatheon cCore and Jatheon Cloud. In 2021, the company released social media and IM features for Jatheon Cloud, and in 2022, Jatheon was included in Gartner's MQ for Enterprise Information Archiving. Jatheon continues to be included in all major industry reports and has an average aggregated score of 4.8 on all major software review platforms.

It remains Jatheon's mission to ensure security and bring peace of mind to businesses and organizations in regulated industries.. The company is headquartered in Toronto, but serves clients worldwide through a wide network of global business partners. For more information, please visit www.jatheon.com.
