Unilateral Biportal Endoscopy Market Statistics: The global Unilateral Biportal Endoscopy market size was \$295.31 million in 2021, and is estimated to reach \$548.43 million by 2031, growing at a CAGR of 6.4% from 2022 to 2031.

Unilateral Biportal Endoscopy Market Growth Drivers:

1. Advantages over open surgery: Unilateral biportal endoscopy offers smaller incisions, reduced tissue trauma, less post-operative pain, faster recovery, and shorter hospital stays compared to traditional open surgery, driving its adoption and market growth.

2. Increasing prevalence of chronic diseases: The higher prevalence of chronic diseases like orthopedic conditions, spinal disorders, and joint diseases has increased the demand for minimally invasive techniques like unilateral biportal endoscopy. It enables accurate diagnosis, treatment, and management of these conditions, contributing to market growth.
3. Technological advancements: Advances in endoscopic technology, such as high-definition imaging, improved instrumentation, and enhanced visualization systems, have enhanced the safety and effectiveness of unilateral biportal endoscopy. These advancements attract healthcare providers and drive market growth.
4. Growing demand for minimally invasive procedures: The preference for minimally invasive procedures is on the rise among patients and healthcare providers due to benefits like reduced scarring, minimal blood loss, and faster recovery. Unilateral biportal endoscopy meets this demand and promotes market growth.
5. Aging population and increased healthcare expenditure: The global aging population is more prone to age-related conditions that often require surgical interventions. Moreover, increased healthcare expenditure and improved access to advanced medical technologies support the adoption of unilateral biportal endoscopy, leading to market growth.
