The global drug screening market is estimated to reach value of USD 13.56 Billion by 2027, according to a current analysis by Emergen Research. Growth in the consumption of alcohol and illegal substances and stringent regulations in developing as well as developed regions are among the major driving factors for the drug screening market.

The drug screening market is primarily driven by the rise of substance abuse and other addictive

substances. Opioid abuse is a serious problem in the United States due to high addiction levels. Over 200 illnesses, injuries and other health problems are caused by alcohol consumption. Accidental and intentional injuries such as motor vehicle accidents, violent crimes and suicides account for a significant portion of the disease burden associated with alcohol use. According to the World Health Organization (WHO), alcohol accounts for approximately 5.1% of the global burden of illness and injury, based on disability-adjusted life years (DALYs). Substantial technological advancement in drug screening procedures is another key factor driving revenue growth of the market.

List of Key Players Profiled in the Drug Screening Market Report:

Quest Diagnostics, LabCorp, Drägerwerk, Thermo Fisher Scientific, Alfa Scientific Designs, Omega Laboratories, Roche Diagnostics Limited, Siemens Healthineers, Premier Biotech, Psychemedics

Target Audience of the Global Drug Screening Market Report:

Key Market Players.

Investors.

Venture capitalists.

Small- and medium-sized and large enterprises.

Third-party knowledge providers.

Value-Added Resellers (VARs).

Global market producers, distributors, traders, and suppliers.

Research organizations, consulting companies, and various alliances interested in this sector.

Government bodies, independent regulatory authorities, and policymakers.
