Blockchain distributed ledger technology provides better data security to its client enterprises. In general, enterprises are required to stock and share private data between different shareholders involved in a project. Blockchain distributed ledgers help them to store and manage that private information with high level of security. Restricting identity theft, ending denial of service attacks, and avoiding data tampering are three aspects in which blockchain distributed ledgers ensure data security to enterprises.

Some Key Highlights from the Report

In 2021, global digital currency platform, Intercoin, partnered with India Blockchain Alliance. This collaboration is geared to accelerate exposure of blockchain distributed ledger by implementing cryptocurrencies and NFTs for businesses, organizations, and universities.

Solution segment accounted for significantly large revenue share in 2020. Solution permits digital ledger network and application developers to customize distributed ledger networks. In addition, high demand for solutions such as Ethereum, Hyper Ledger Fabric in cross industries and R3 Corda, and Ripple in financial services is driving revenue growth of this segment.

Private segment accounted for largest revenue share in 2020 owing to ability to limit participation in transactions and therefore, lower risk. It is relatively inexpensive to change regulations and transaction processes by using blockchain distributed ledger technology.

The report offers a comprehensive overview of the competitive landscape and covers company profiles, production and manufacturing capacity, product portfolio, expansion strategies, and business initiatives such as mergers and acquisitions, joint ventures, collaborations, partnerships, and product launches and brand promotions among others.
