

Pioneering the AI Frontier in Organisations: Join Global Experts on July 5, 2023

Digital Drucker Forum's AI booster is scheduled for July 5, 2023 from 16:00 to 17:30 CET / 19:30 to 21:00 IST

VIENNA (WIEN), AUSTRIA, June 28, 2023 /EINPresswire.com/ -- The future of business is being written right now, and AI is the ink. But what does this AI-driven future really mean for work, teams, and organisations?

Digital Drucker Forum's AI-Booster event will discuss Large Language Models (LLMs) like ChatGPT, and its transformative role from the AI pioneers. These trailblazing leaders are already integrating LLMs into their operations, and they're ready to share their real-world experiences. "My upcoming BOT will share all that I know...with the world at no charge," says author and executive coach, Marshall Goldsmith.

The event panelists, from leading organisations will reveal how they're leveraging AI to fuel creative resilience. They'll discuss lessons, challenges, and the unanswered questions that humanity needs to tackle, as it navigates this new frontier. "AI literacy is the new reading and writing," emphasizes Isabella Mader, CEO of Excellence Research, Executive Advisor at [Global Peter Drucker Forum](#).

How will the new AI tools affect organisations? "Businesses that fail to upskill their employees risk being replaced by AI technologies" warns Thuy Ngoc Tran, Founder and CTO of Astrid Education.

The poster features a stylized brain with vibrant, multi-colored smoke or paint splashes emanating from it, set against a dark background. The text is overlaid on a yellow and black background.
