Military transport aircraft refers to a military-owned transport aircraft used to support military operations by performing multi-role duties such as aerial refueling, intelligence-gathering, rescue missions, transporting military cargo & military troops, military vehicles, and others. Military transport aircraft have a huge cargo storage space in which a wide range of things can get stored. In addition, these aircraft are designed to carry military tanks, small trucks, and armed vehicles from military base stations to war sight or other required locations without much human effort.
