

Anti-Caking Agents Market 2023 | Growth, Analysis Report, Share, Trends and Forecast to 2031

Rising demand from a number of industries, including the food, & fertilizer sectors, is likely to drive growth in the market for anti-caking agents globally

PORLAND, OR, US, June 28, 2023 /EINPresswire.com/ -- Increased demand for convenience food such as packaged food and ready-to-eat food drives the growth of the [Anti-Caking Agents Market](#). On the other hand, strict government policies regarding the usage of chemical products restrain the growth to some extent.

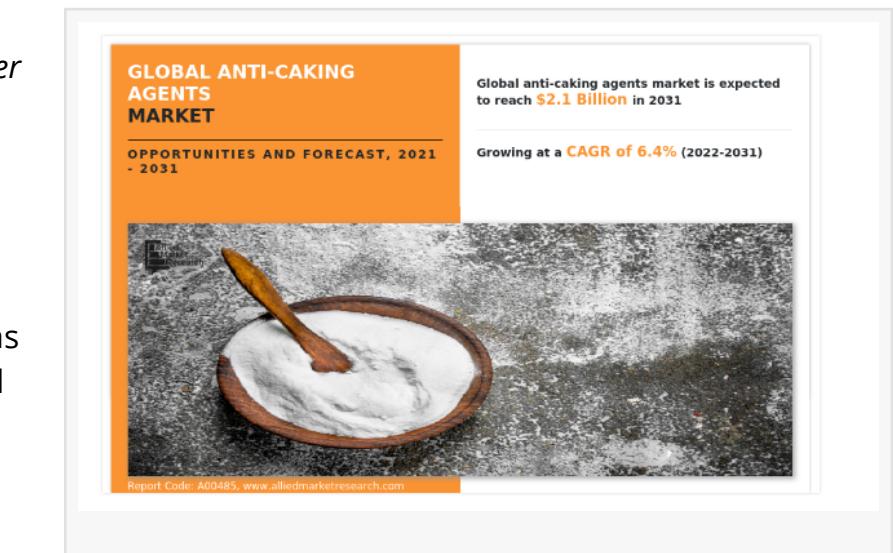

However, advent of top-end anti-caking agents and their features that benefit retailers to understand consumer behavior is expected to create lucrative opportunities in the industry.

Increased demand for convenience food such as packaged food and ready-to-eat food drives the growth of the anti-caking agents market.”

Allied Market Research

The major players analyzed for the global Anti-Caking Agents industry are Evonik Industries AG (US), PPG Industries Inc. (US), Brenntag AG (Germany), Univar Solutions Inc. (US), Solvay SA (Belgium), Cabot Corporation (US), Agropur Ingredients (US), Huber Engineered Material, Kao Corp., IMAC Inc.

As per application, it is categorized into dairy, bakery, seasoning and condiments, and others. The bakery

segment is anticipated to grow at the highest CAGR during the forecast period, due to the consumption of bakery products such as cookies, muffins, pastries and others. The sale of anti-caking agent bakeries is one of the industry's fastest-growing sales channels. Because they are easily available. For the purpose of attracting more customers, this platform provides a variety of

discounts on bakery product purchases.

In 2021, Europe accounted for 34.5% of the global Anti-Caking Agents Market Share and is expected to maintain its dominance during the forecast period. High demand for bakery food products has led to the use of food additives such as anti-caking agents in the region. Spain, Germany, and France are expected to be the largest markets due to their higher feed production than other European countries. Driven by growing demand for higher-quality meat products, the feed additive market in the region, especially anti-caking agents, is growing rapidly.

By source, the natural segment held the major share in 2021, accounting for more than half of the global anti-caking agents market. Natural anti-caking agents increase product quality, reduce maintenance and downtime brought on by machine jams, and turn down the price of scrap. Both businesses and customers profit from this. These factors propel the segment growth. The synthetic segment, on the other hand, would portray the fastest CAGR of 6.8% during the forecast period. The demand for synthetic anti-caking agents is anticipated to remain high because they are simple to produce in large quantities and do not provide producers with a more affordable alternative for a variety of uses.

Anti-caking chemicals are used in food and beverages due to rising customer demand for takeout, fast food, and processed foods. Powered cellulose tricalcium phosphate, sodium bicarbonate, polydimethylsiloxane, magnesium trisilicate, potassium aluminum silicate, and polydimethylsiloxane are a few of the commercial anti-caking substances on the market.
