Definition:

The word licorice was derived from the Greek, which meant sweet root. Licorice is essentially a type of flowering plant that is subject to Southern Europe and Asia. The sweet flavor in licorice is provided by glycyrrhizin, which is 50 times sweeter than sugar. Licorice candy is a sweet which is usually flavored and colored black and red with the extracts of the roots of the licorice plant. A huge variety range of licorice sweets is produced all around the world. It is usually manufactured in the shape of chewy ropes or tubes. Black licorice combined with anise extract is also a well-known flavor in other types of sweets like jellybeans. In addition, there are various other licorice-based sweets that are sold in the United Kingdom, like licorice allsorts. Dutch and Nordic licorice normally contains ammonium chloride in place of sodium chloride, significantly in salty licorice.
