SHERIDAN, WYOMING, UNITED STATES, June 29, 2023 /EINPresswire.com/ --

According to the report by Expert Market Research (EMR), the [Global Tinea Corporis Treatment Market Size](#) is being aided by the growing antifungal drugs market, which is expected to grow at a CAGR of 3% in the forecast period of 2023-2028.

Aided by the rising incidence of fungal infections and the broadening range of treatment options for Tinea Corporis, the market is expected to grow significantly by 2028.

Tinea Corporis, commonly known as ringworm, is a fungal infection that primarily affects the skin. Its treatment often involves antifungal medications, which are available in various forms, such as creams, lotions, powders, and tablets. These medications not only help in eliminating the infection but also alleviate associated symptoms like itching and redness. Aside from their therapeutic benefits, some antifungal drugs also exhibit preventive properties, making them an essential component in the broader dermatological treatment landscape.

Tinea Corporis Treatment Market Size, Share, Price, Trends, Growth, Key Players, Report and Forecast

The escalating global incidence of fungal infections is a significant driver for the tinea corporis treatment market growth. With the expanding global population and increased exposure to risk factors such as public showers and locker rooms, there has been a marked rise in the prevalence of Tinea Corporis. This has spurred demand for effective treatments, benefiting the overall market. Additionally, increased awareness about personal hygiene and skin health has further contributed to the demand for Tinea Corporis treatments.

The expanding range of Tinea Corporis treatment options also plays a substantial role in stimulating tinea corporis treatment market development. The pharmaceutical industry has witnessed the introduction of several new antifungal drugs with improved efficacy and fewer side effects. The cosmetic industry has also leveraged these advancements, incorporating antifungal ingredients into various skincare products, thus widening their application range. Moreover, innovations in drug delivery systems, such as the development of long-acting topical formulations, have added a new dimension to the Tinea Corporis treatment market.
