According to HTF Market Intelligence, the Global Indoor Air Quality Monitor market to witness a CAGR of 8.94% during forecast period of 2023-2029. The market is segmented by Application (Government, Industrial {Oil & Petrochemical, Chemical Plants, Power Plants, Manufacturing Plants, Other}, Residential, Commercial {Hotels, Malls, Departmental Stores, Restaurants & Cafes}) by Type (Portable Type, Stationary Type) by Automation (Fully-Automatic, Semi-Automatic) and by Geography (North America, South America, Europe, Asia Pacific, MEA). According to HTF Market Intelligence, the Indoor Air Quality Monitor market is expected to see a growth rate of 8.94% and may see market size of USD1785.2 Million by 2028, currently pegged at USD1074.6 Million.

Definition:

Indoor Air Quality Monitor is used to monitor the quality of the air in the home, school, office, or building environments. The improved indoor air can help residential, commercial, and industrial end-users to achieve health and safety goals. The indoor air quality monitor provides more comfortable and cleaner air in the surrounding environment. These monitors are capable to measure specific pollutants such as VOCs, CO, O₃, NO₂, NH₃, and others. Indoor air quality has been a matter of concern for public health. Hence, in order to maintain the desired level of comfort, it is essential to perform indoor air quality monitoring in all buildings. The growing adoption from the real estate industry is supplementing the market demand.

Market Trends:

- Emerging Environment-Friendly Industries

Market Drivers:

- Rising Adoption of Smart Home Living
- Growing Public Awareness Owing to Healthcare and Environmental Implications of Air Pollution
- Government Regulations for Reducing, Monitoring and Controlling Air Pollution

Market Opportunities:

- Technological Advancements in the Field of Air Pollution Monitoring
- Growing Industrial Sector to Drive the Need for Indoor Air Quality Monitoring

Revenue and Sales Estimation — Historical Revenue and sales volume are presented and further data is triangulated with top-down and bottom-up approaches to forecast complete market size and to estimate forecast numbers for key regions covered in the report along with classified and well-recognized Types and end-use industry.

SWOT Analysis on Indoor Air Quality Monitor Players

In addition to Market Share analysis of players, in-depth profiling, product/service, and business overview, the study also concentrates on BCG matrix, heat map analysis, FPNV positioning along with SWOT analysis to better correlate market competitiveness.

Demand from top-notch companies and government agencies is expected to rise as they seek more information on the latest scenario. Check the Demand Determinants section for more information.

Regulation Analysis

- Local System and Other Regulation: Regional variations in Laws for the use of Indoor Air Quality Monitor
- Regulation and its Implications
- Other Compliances
