About Arbitration Resolution Services, Inc.

ARS, an early ADR innovator, is a leading provider of more accessible and affordable cloud-based alternative dispute resolution services. The proprietary Arb-IT™ platform fully automates the step-by-step process of mediation and arbitration and was the first company to integrate technology with expert arbitrators and mediators for a revolutionary approach to dispute resolution. Version 3.0, also offered in a white label edition, integrates easy-to-use technology based on unparalleled process and design standards supporting an IRL or in-real-life approach to dispute resolution. #ADR4IRL reduces up to 80% of the costs of traditional litigation in as little as 20% of the time. ARS's lower, graduated fees mean attorneys, individuals, and companies of any size can file claims previously too small or costly to pursue.
