

# Taktikal Partners with Veriff to Power Global Identity Verification for Digital Signatures

*Veriff bolsters Taktikal's authentication process for more secure and compliant customer onboarding and workflows*

NEW YORK , USA, July 5, 2023

/EINPresswire.com/ -- Veriff, a global identity verification provider, today announced a partnership with Taktikal, a leading e-signature software suite, to provide enhanced identity verification capabilities for their customers on a global scale. With this partnership, Veriff adds an extra layer of safety and security to Taktikal's automated onboarding and workflow processes through the strengthened authentication of digital signatures, and enables the company to expand its customer base to new geographic regions.

Janer Gorohhov, Veriff Go-founder & CPO

Taktikal's Smartflows solution allows organizations to build, visualize, and automate their customer-facing processes in one platform, such as contracts, onboarding solutions with built-in tools for Know Your Customer (KYC) and regulatory compliance. The technology verifies the identities of its users and links them directly with digital signatures. Veriff strengthens the security of Taktikal's signatures through its streamlined, AI-powered identity verification technology, and helps ensure compliance by qualifying them as Advanced Signatures (AES) that are uniquely linked to the signer.

“

We're thrilled to partner with Taktikal to help organizations deliver faster identity verification processing, less operational risk and overall more trust in common workflow applications.”

*Janer Gorohhov*

“The use of digital signatures in onboarding processes and other business workflows has skyrocketed with

digitalization, and as a result we have seen a rise in fraud attempts,” said Janer Gorohhov, Veriff co-founder and CPO. “It's never been more important for businesses across industries to be steps ahead of these bad actors and confirm the real identities of users signing documents.

We're thrilled to partner with Taktikal and work together to help organizations deliver faster identity verification processing, less operational risk and overall more trust in common workflow applications."

Veriff's ability to verify more than 11,300 government-issued IDs from more than 230 countries and in 48 different languages not only helps ensure compliance with the local regulations of Taktikal's customer base, but it also offers an alternative option for users who are unable to present a mobile e-ID.

"Strong identification is the foundation for establishing trust in signatures, contracts and customer onboarding, especially in high-risk industries such as finance and insurance," said Valur Thor Gunnarson, CEO at Taktikal. "We needed a partner that could provide best-in-class identity verification technology to ensure the strongest identification confidence in regions where mobile e-IDs are not as widespread. Veriff has been a key partner, empowering Taktikal to establish an enhanced level of trust that users participating in contracts and onboarding workflows are who they say they are, while allowing us to expand our user base to markets like the US and UK where mobile e-IDs are less common."
