This type of security refers to the procedures and methods used to protect passengers, personnel, aircraft, and airport property from harm caused by accident or malice, crime, and other dangers. This type of security is a set of measures and people and material resources aimed at protecting civil aviation from acts of unlawful interference such as terrorism, sabotage, threats to life and property, false threat communication, bombing, and so on. It tries to keep these risks at bay by using various methods of scanning.
