

Silicon Carbide Market Size Expected To Reach \$4.14 Billion By 2027

The Business Research Company's Silicon Carbide Global Market Report 2023 – Market Size, Trends, And Global Forecast 2023-2032

LONDON, GREATER LONDON, UK, July 24, 2023 /EINPresswire.com/ -- The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032

The Business Research Company's "Global Silicon Carbide Market Report 2023" is a comprehensive source of information that covers every facet of the market. As per TBRC's silicon carbide market forecast, the silicon carbide market size is predicted to reach a value of \$4.14 Billion by 2027, rising at a significant annual growth rate of 15.6 percent through the forecast period.

The Business Research Company's global market reports are now updated with the latest market sizing information for the year 2023 and forecasted to 2032”

The Business Research Company

The growth in the global silicon carbide industry is due to emerging demand for electric vehicles is significantly. Asia-Pacific region is expected to hold the largest silicon carbide market share. Major silicon carbide companies include are Infineon Technologies, Wolfspeed Inc., Rohm, ESK-SiC GmbH, ESD-SiC BV, Grindwell Norton Ltd., Entegris Inc.

Silicon Carbide Market Segments

- By Product: Black Silicon Carbide, Green Silicon Carbide
- By Device Type: SiC Discrete Device, SiC Bare Die
- By Application: Steel, Automotive, Aerospace, Military and Defense, Electrical and Electronics, Healthcare, Other Applications
- By Geography: Asia-Pacific, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

The silicon carbide are hard and insoluble substances used as an abrasive and electrical resistor in high-temperature devices. Silicon carbide is a crystalline chemical compound of silicon and carbon produced synthetically in the form of SiC powder. It is suitable for high-power applications as it offers extreme chemical inertness, hardness, relatively low thermal expansion, high thermal conductivity, resistance to corrosion, and a high force-to-weight ratio.
