The nutraceuticals are classified as food but are also used for medical purposes. Nutraceuticals

are specially designed consumable products from various food sources that contain a high concentration of bioactive compounds that have several nutritional, health, and medicinal benefits. Nutraceutical products and supplements can be taken by an individual along with a normal daily diet to get additional nutrients to promote good health and wellbeing. Nutraceutical products are used to improve health, prevent chronic diseases, increase life expectancy, and support the physical and mental health of an individual. They are also proven to have a potentially positive effect on health conditions like cardiovascular disease, hypertension, diabetes, inflammation, cancer, and others.
