Top Profiled Companies:

- Abbott Nutrition
- Nestle Health Science
- Danone Nutricia
- Braun Melsungen AG
- Fresenius Kabi AG

- Meiji Holdings Co. Ltd.

## Some Key Highlights from the Report

- In 2022, the standard formula segment accounted for a significantly large revenue share of the Indiana homecare enteral feeding formula market. This is due to the growing demand for these formulas, which provide all of the nutrients, vitamins, and minerals required by the body for healthy growth and development. These are typically recommended for patients in need of long-term enteral feeding including chronic illnesses or disabilities. Standard formulas are readily available and typically less expensive than other types of enteral feeding formulas. Furthermore, these are easily administered via a feeding tube and do not require any additional preparation.
- The adults segment accounted for largest revenue share in the Indiana homecare enteral feeding formula market in 2022. This is due to the growing demand for these formulas to meet the nutritional needs of adults who are unable to consume food orally due to medical conditions such as stroke, cancer, or gastrointestinal disorders. Adult enteral feeding formulas are available in a variety of formulations, including basic formulas, disease-specific formulae, blenderized formulas, and customized formulas. These formulae are often supplied using a feeding tube, which can be inserted directly into stomach or intestines.
- Demand for enteral feeding formula for homecare in Indiana is expected to rise significantly in the coming years. A feeding tube is used in the medical procedure known as enteral feeding to administer food and nutrients directly into the patient's stomach. This tube is commonly used for people who are unable to eat orally due to illnesses like cancer, neurological impairments, or digestive issues.
