

# Global Egg Freezing Services Market To Witness Exponential CAGR of ~6.7% over the Forecast Period (2023 – 2031)

*Global Egg Freezing Services Market (Pre & Post COVID-19 Impact Analysis); A Report by Absolute Markets Insights.*

HOUSTON, TEXAS, UNITED STATES, July 11, 2023 /EINPresswire.com/ -- Egg freezing (oocyte cryopreservation) is the process of removing eggs from a woman's ovaries and storing them for later use when the woman feels ready for conception and pregnancy. These frozen eggs are safe to use and retain their quality for up to ten years after they have been frozen. Since the 1980s, egg freezing has come a long

way. What began as a technique for women facing fertility-threatening medical procedures is now known as the modern woman's childbearing insurance policy. Globally, the number of women freezing their eggs has increased dramatically. According to a survey, from the Human Fertilisation and Embryology Authority (HEFA), more people are undergoing procedures than ever before, with egg- and embryo-freezing being the fastest-growing reproductive therapies.

According to key experts, the Covid-19 pandemic had a significant influence on the number of women who wanted to freeze their eggs in the goal of maintaining their fertility. The increase in demand for egg freezing services at fertility clinics contrasts with other women's expressed desire to give birth in the near future. According to a research, more than one-third of American women poll indicated the epidemic had caused them to postpone or limit the number of children they intend to have. Furthermore, as per a recent report by American Society of Reproductive Medicine, the number of egg-freezing cycles surged by more than 31% in the United States a year after the COVID-19 outbreak began. Thus, the global egg freezing services market is experiencing tremendous growth.

Why Global Egg Freezing Services Market Report Offered by Absolute Markets Insights is Unique?

Our 402+ Pages Research Study Will Include Extensive Information on the Following Pointers:

- Global Market size and Forecast Values (2015 – 2031), in terms of revenue (US\$ Million) by segments/sub-segments; wherein 2015 to 2021 has been considered as historic years, 2022 as the base year, while 2023 to 2031 will be taken as the forecast period.
- Split of the market revenue (US\$ Million) into all the relevant segments & sub-segments across all major regions/countries.
- Market Determinants and Influencing Factors.
- Market Dynamics
  - o Drivers
  - o Restraints
  - o Opportunities
  - o Challenges
- Business & Technological Trends
- Covid-19 Impact Analysis
- Macro-Economic and Micro-Economic Indicators
- Porter's Five Forces Analysis
  - o Bargaining Power of Buyers
  - o Bargaining Power of Suppliers
  - o Threat of New Entrants
  - o Threat of Substitutes
  - o Competitor's Rivalry
- Competitive Benchmarking: Global Presence and Growth Strategies
  - o Mergers and Acquisitions
  - o Product Launches
  - o Investments Trends
  - o R&D Initiatives
- Market Share Analysis, Taking Base Year As 2022
- Detailed profiles of Major Market Participants Operating in the Market, Encompassing Information On The Following Pointers:
  - o Company Details
  - o Company Overview
  - o Product Offerings
  - o Key Developments
  - o Financial Analysis
  - o SWOT Analysis

- o Business Strategies
- Key Findings

Which Process for Egg Freezing Will Experience Huge Growth in the Global Egg Freezing Services Market in the upcoming Years?

Slow freezing segment had the highest share in the global egg freezing services market in 2022. Traditional slow-freezing procedures have been used to freeze all types of human embryos, but clinically acceptable outcomes have not been attained; also, the findings are inconsistent. Furthermore, the slow-freezing process is both costly and time-consuming. Vitrification, also known as flash freezing, is a process that uses fast cooling rates in conjunction with a high concentration of cryoprotectant to avoid the formation of ice crystals during chilling and warming. Advances in cryoprotectant solutions have contributed to better preservation of the eggs' structural integrity and viability. These improved solutions reduce the potential damage to eggs during freezing and thawing, resulting in higher chances of successful fertilization and pregnancy. Additionally, the sealed containers used for vitrification provide a barrier against external contaminants, reducing the chances of liquid nitrogen-mediated contamination. According to research and data gathered by Absolute Markets Insights; the flash freezing (vitrification) approach is superior to slow-cooling processes in assisted reproductive technologies and is projected to gain further acceptance and popularity in the near future.

Based on Region Segment, which Region is Anticipated to be the Fastest Growing Region in the Egg Freezing Services Market During the Forecast Period?

Asia Pacific region is estimated to be the fastest growing region during the forecast period 2023-2031. Asian societies have always put a great focus on youthful marriage and family formation. However, there has been a recent trend in which more women are seeking higher education and employment prospects. As a result, more women are delaying marriage and childbearing which has led to increasing demand for fertility preservation methods such as egg freezing. Many Asian countries, including Japan and Taiwan, allow women to freely freeze their eggs. Singapore has abolished its rule on egg preservation for healthy women. Elective egg freezing is now being adopted in Singapore from July 1, 2023, wherein the age limit for women to store their eggs to maintain their fertility is being raised from 35 to 37. Meanwhile, in China, Malaysia, and Hong Kong, reproductive procedures such as in vitro fertilisation (IVF) and egg freezing are still widely outlawed for unmarried women, despite the fact that the country's population reduced in 2022 for the first time in decades. Thus, to overcome these challenges along with government initiatives and healthcare organizations, Hunan became the first province in China to provide egg freezing, or oocyte cryopreservation, to single women in August 2021. Hence, these factors will accelerate the growth of egg freezing services market in Asia Pacific region.

## Global Egg Freezing Services Market Snapshot Market Segmentation

- By Type
  - o Social
  - o Medical
- By Process
  - o Flash freezing
  - o Slow freezing
- By Age Group
  - o 18 to 24
  - o 25 to 33
  - o 34 to 40
  - o Above 40
- By Stages
  - o Cleavage stage
  - o Blastocyst stage

### Companies Included

- o Boca Fertility
- o CK Birla Healthcare Pvt. Ltd.
- o EVOLVE Egg Freezing
- o Extend Fertility LLC.
- o Grace Fertility
- o HCA International Limited.
- o Ice Fertility
- o IVFLA FERTILITY'
- o Jetanin Hospital'
- o King's Fertility Limited
- o NOW-fertility
- o Rhea Healthcare Private Limited
- o The Agora Clinic
- o The London Women's Clinic
- o Vishvas Fertility
- o Zoi Fertility
- o Other Market Participants

### Regions Covered:

- North America (U.S., Canada, Mexico, Rest of North America)
- Europe (France, The UK, Spain, Germany, Italy, Nordic Countries (Denmark, Finland, Iceland, Sweden, Norway), Benelux Union (Belgium, The Netherlands, Luxembourg), Rest of Europe)
- Asia Pacific (China, Japan, India, New Zealand, Australia, South Korea, Southeast Asia (Indonesia, Thailand, Malaysia, Singapore, Rest of Southeast Asia), Rest of Asia Pacific)

- Middle East & Africa (Saudi Arabia, UAE, Egypt, Kuwait, South Africa, Rest of Middle East & Africa)
- Latin America (Brazil, Argentina, Rest of Latin America)

#### About Us:

Absolute Markets Insights assists in providing accurate and latest trends related to consumer demand, consumer behavior, sales, and growth opportunities, for the better understanding of the market, thus helping in product designing, featuring, and demanding forecasts. Our experts provide you the end-products that can provide transparency, actionable data, cross-channel deployment program, performance, accurate testing capabilities and the ability to promote ongoing optimization. From the in-depth analysis and segregation, we serve our clients to fulfill their immediate as well as ongoing research requirements. Minute analysis impact large decisions and thereby the source of business intelligence (BI) plays an important role, which keeps us upgraded with current and upcoming market scenarios.
