What is a Bike Sharing ? :

Bike sharing refers to a shared transportation service that offers conventional bikes for short-term use in exchange for a fee. It enables individuals to rent a bike from one docking station and return it to another within the same system. This environmentally friendly mode of transportation allows riders to travel without fuel consumption, thereby reducing carbon dioxide (CO2) emissions. Bike sharing is particularly designed for commuters who can conveniently pick up bikes when needed at various locations and times. It provides a cost-effective and convenient means of transportation, primarily for short-distance trips. Additionally, it offers financial savings, helps alleviate road congestion, and provides health benefits such as preventing depression and anxiety while improving overall fitness.
