In addition to Mr. Van Praagh, other all-star experts in the cast are: Dr. Norm Shealy, M.D., Ph.D., Dr. Raymond Moody, M.D. (New York Times Bestselling Author of "Life After Life"), Dr. Vernon Sylvest, M.D. (pathologist), Dr. Kenneth Rose (Ph.D., Harvard University), an acclaimed expert in comparative religion, Dr. Jeffrey Rediger, M.D. (Harvard Professor and researcher into the phenomena of life-after-death experiences and spiritual healing), Psychics Eddie Conner, Justin Terry and Reverend F. Reed Brown, along with Captain Frederick "Skip" Atwater (the operations officer in charge of the top-secret military StarGate program that investigated consciousness beyond the physical mind), and many others.

Both the film's executive producer, Garrett Sayre, and the film's director and producer, Steve Sayre, served in various investigative capacities that prepared them for their search into the afterlife.

Steve Sayre worked as a private investigator for three years specializing in missing persons and background investigations. He also served as a U.S. Marshal on special assignment, going undercover as a CPA to investigate a multi-million-dollar firm that was embezzling millions from various clients. Subsequent to his private investigative and undercover activities, Steve completed combat training at Fort Leonard Wood, Missouri, and served in a top-secret capacity for both the United States Army and the United States Air Force.

Also relevant to the subject matter of "Ghosts and the Afterlife," Steve has undergone two after-death experiences after dying twice on the operating room table. Both experiences of clinical death were due to Sayre having suffered serious injury to his heart in the military, which incidents provided him with a direct personal understanding of the afterlife phenomenon.

Steve's brother, Garrett Sayre, the film's executive producer, served in a top-secret capacity for Naval Intelligence and, amongst his many duties, provided anti-terrorist reports to the Joint Chiefs of Staff.

Between the two of them, they spent 12 years researching the topic to present all the most salient and supportive research regarding the afterlife from both a historical and a scientific perspective, making the film the first truly scientific investigation into ghosts and life after death.

The program is narrated by Kelsey Bohlen, who actually experienced a full-form apparition on tape while serving as the film's on-camera narrator.
