It is highly reactive and can form explosive mixtures with air, making it a dangerous substance to handle without proper precautions. It is commonly used as a refrigerant, a cleaning agent, and in the production of fertilizers, textiles, and plastics.

China, the United States, Brazil, Russia, Germany, and Australia are the top ammonia-producing countries around the globe.

Key Details About the [Ammonia Price](#) Trend:

Procurement Resource does an in-depth analysis of the price trend to bring forth the monthly, quarterly, half-yearly, and yearly information on the Ammonia price in its latest pricing dashboard. The detailed assessment deeply explores the facts about the product, price change over the weeks, months, and years, key players, industrial uses, and drivers propelling the

market and price trends.

Each price record is linked to an easy-to-use graphing device dated back to 2014, which offers a series of functionalities; customization of price currencies and units and downloading of price information as Excel files that can be used offline.

The Ammonia Price chart, including India's Ammonia price, and USA's Ammonia price, pricing database, and analysis can prove valuable for procurement managers, directors, and decision-makers to build up their strongly backed-up strategic insights to attain progress and profitability in the business.

Industrial Uses Impacting Ammonia Price Trend:

Ammonia is an essential industrial chemical that is primarily used in various end-user industries. One of its most common uses is as a feedstock for the production of fertilizers, such as urea, ammonium nitrate, and ammonium sulfate.

It is also used as a refrigerant in industrial and commercial cooling systems. It is highly effective at absorbing heat, making it an ideal choice for use in refrigeration and air conditioning.

On the other hand, it is also used in the production of textiles and synthetic fibers, such as nylon and rayon.

It also finds its application in the production of plastics and resins. It is also used as a raw material in the manufacture of products such as polyamides and polyurethanes.

Key Players:

Yara International
Qatar Fertiliser Company
Nutrien Ltd
Jordan Phosphate Mines Company Limited
Eurochem Group AG
Yidu Xingfa Chemical Co., Ltd
Yunnan Yuntianhua International Chemical Co., Ltd
Chemische Fabrik Budenheim KG
Innophos, Inc
Maaden-Saudi Arabian Mining Company

Recent News:

September 2022: The Global Blue Ammonia Hydrogen Project in United State Gulf Vf was announced by OCI. The company started construction of an about 1.1 million tons per annum

blue ammonia facility with an infrastructure of about 2.2 mtpa capacity.

About Us:

Procurement Resource offers in-depth research on product pricing and market insights for more than 500 chemicals, commodities, and utilities updated daily, weekly, monthly, and annually. It is a cost-effective, one-stop solution for all your market research requirements, irrespective of which part of the value chain you represent.

We have a team of highly experienced analysts who perform comprehensive research to deliver our clients the newest and most up-to-date market reports, cost models, price analysis, benchmarking, and category insights, which help in streamlining the procurement process for our clientele. Our team tracks the prices and production costs of a wide variety of goods and commodities, hence providing you with the latest and consistent data.

To get real-time facts and insights to help our customers, we work with a varied range of procurement teams across industries. At Procurement Resource, we support our clients, with up-to-date and pioneering practices in the industry, to understand procurement methods, supply chain, and industry trends, so that they can build strategies to achieve maximum growth.
