#### Market Dynamics And Restraints :

Increasing number of clinical trials in emerging economies due to lower operational costs is expected to boost demand for eClinical solutions software. For instance, data from ClinicalTrials.gov, showed that, in 2017, 36% of clinical trials were conducted in the U.S. and 47% in non-U.S. countries. Clinical trial data is significant for the quick development of new treatments in a cost-effective manner. It is the most valuable asset for life sciences companies. Companies outsource the intense administrative parts of research and regulatory and ethics filings, to international countries for economical expenses and reducing cost and time. Developing nations can often offer access to a larger number of patients, with quicker enrollment, and in general a shorter trial timeline from start to finish. Moreover, increasing number of clinical trials for various chronic diseases such as cancer is expected to fuel growth of the eClinical solutions market.
