Market Analysis and Insights: Global Enterprise Cyber Security Market

Cyber Security is the body of technologies, processes and practices designed to protect networks, computers, programs and data from major cyber threats, such as cyber terrorism, cyber warfare, and cyber espionage. In their most disruptive form, cyber threats take aim at secret, political, military, or infrastructural assets of a nation, or its people. In a computing context, security includes both Cyber Security and physical security.

Cyber Terrorism

Cyber terrorism is the disruptive use of information technology by terrorist groups to further their ideological or political agenda. This takes the form of attacks on networks, computer systems, and telecommunication infrastructures.

## Cyber Warfare

Cyber warfare involves nation-states using information technology to penetrate another nation's networks to cause damage or disruption. In the US and many other nation-states, cyber warfare has been acknowledged as the fifth domain of warfare (following land, sea, air, and space). Cyber warfare attacks are primarily executed by hackers who are well trained in exploiting the intricacies of computer networks and operate under the auspices and support of the nation-states. Rather than "shutting down" a target's key networks, a cyber-warfare attack may intrude networks for the purpose of compromising valuable data, degrading communications, impairing infrastructural services such as transportation and medical services, or interrupting commerce.

## Cyber Espionage

Cyber espionage is the practice of using information technology to obtain secret information without permission from its owners or holders. Cyber espionage is most often used to gain strategic, economic, political, or military advantage. It is conducted through the use of cracking. The global Enterprise Cyber Security market size was valued at USD 56840 million in 2022 and is forecast to a readjusted size of USD 98700 million by 2029 with a CAGR of 8.2 percentage during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

## Market segmentation

Enterprise Cyber Security market is split by Type and by Application. For the period 2018-2029, the growth among segments provide accurate calculations and forecasts for sales by Type and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

The major players covered in the Enterprise Cyber Security market report are:

Venustech

Westone

H3C

Huawei

Topsec

Nsfocus

Sangfor

360 Enterprise Security

Symantec Corporation

Asiainfo

DBAPP Security
