The global Decentralized Finance (DeFi) platforms market size is expected to reach USD 507.92 Billion at a steady CAGR of 43.8% in 2028, according to latest analysis by Emergen Research. DeFi is a decentralized financial platform and can replace middlemen such as brokerages and banks. It enables automatic execution of smart contracts and manages interest payments. These factors are expected to drive revenue growth of DeFi platforms market.

A major factor driving the market growth is transparent financial transactions on DeFi platforms, and payment settlements in real-time. DeFi platforms help automate a range of financial services using smart contracts. It is a peer-to-peer financial service system, where users can access services, such as borrowings as well as derivatives and margins trading, without a centralized intermediary. However, DeFi platforms differ from traditional banks and users may face various risks during transactions.

In recent years, DeFi platform market has gained traction among crypto-enthusiasts, and is attracting investors across regions. This platform operates on blockchain technology, and aims to replace centralized financial institutions as they do not collect fees and charges on transactions. DeFi platform offers a whole range of financial services, ranging from asset management, borrowing, lending, and trading, which is driving growth of the market.
