

Free Traffic Counts Now Available on MyEListing.com

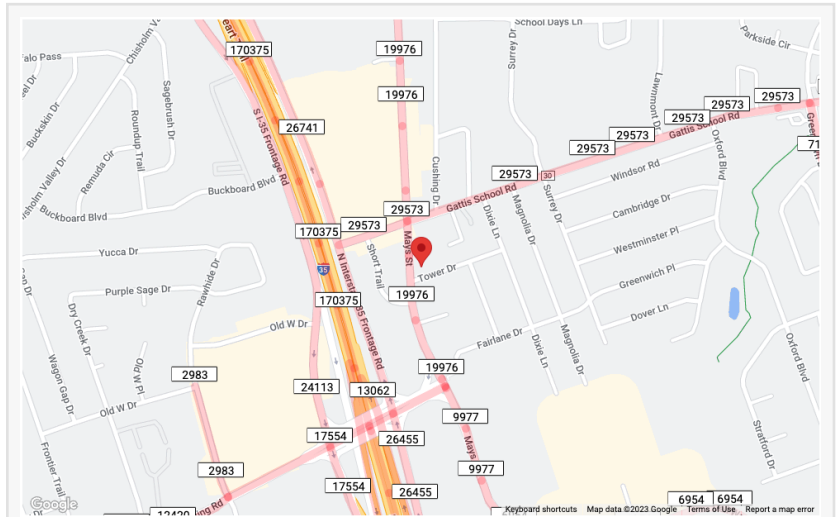

AUSTIN, TEXAS, USA, July 20, 2023 /EINPresswire.com/ -- [MyEListing.com](https://www.MyEListing.com), a free-to-use commercial real estate data and listing platform, has recently [released free road traffic counts](#) as part of their commercial property listings.

Traffic counts provide insight into roadway activity within a given area. For example, they can provide commercial property owners and investors with traffic data that helps them determine how busy or how slow certain roadways are within certain radius.

In the realm of commercial real estate, car traffic counts can provide especially useful information about a given property's location.

According to MyEListing.com, "A restaurant owner looking to relocate might use traffic counts as a means to estimate how many customers they can expect on a day-to-day basis. They can break this data down even further into weekday traffic versus weekend traffic, lunch traffic versus dinner traffic, what traffic might look like in certain areas of town at certain times of day, and so on."

Users of MyEListing.com can begin using the site's free traffic counts immediately: The platform is currently rolling out this information on a city-by-city basis.
