

Point of Care Lipid Test Market: Revolutionizing Cardiovascular Risk Assessment (CAGR of 4.1%)

Point of care lipid tests are used to calculate the blood's triglyceride, lipoprotein, and cholesterol levels.

PORTLAND, OREGON, UNITED STATES, July 19, 2023 /EINPresswire.com/ -- The Point of Care lipid Test Market has experienced significant growth and adoption in recent years, driven by the increasing prevalence of cardiovascular diseases and the need for timely and accurate lipid testing. Point of Care

lipid tests offer the advantage of providing rapid results directly at the patient's bedside or in outpatient settings, enabling healthcare providers to make immediate clinical decisions and initiate appropriate interventions. These tests measure lipid parameters, such as total cholesterol, low-density lipoprotein (LDL) cholesterol, high-density lipoprotein (HDL) cholesterol, and triglycerides, which are critical in assessing an individual's cardiovascular risk profile. The global point of care lipid test market size was valued at \$284.9 million in 2021, and is projected to reach \$426.6 million by 2031, growing at a CAGR of 4.1% from 2022 to 2031.
