

PallyCon Unveils CMAF Integration in TNP Workflow, Elevating Security in High-Quality Media Content Delivery

PallyCon, a leading provider of content security, is thrilled to announce CMAF in the latest addition to its TNP (Transcode, Watermark, and Packaging) services

SAN JOSE, CALIFORNIA, UNITED STATES, July 20, 2023

/EINPresswire.com/ -- In line with its commitment to simplified secured content delivery with its cost-effective solutions, PallyCon has integrated support for Common Media Application Format (CMAF) into its TNP workflow.

CMAF has emerged as a preferred streaming format, revolutionizing the way media content is encoded and packaged for seamless internet streaming. Its adoption has grown steadily since its inception in 2021, owing to its efficiency, improved streaming experience, cost savings, flexibility, and future-proofing capabilities. Major industry players have expressed support for CMAF, recognizing its potential in delivering high-quality media content over the Internet.

The integration of CMAF support into PallyCon's TNP workflow enables content providers to transcode, watermark, encrypt, and package their content seamlessly in CMAF format. This all-in-one solution eliminates the need for additional setup, complexity, and cost, empowering content providers to deliver superior quality content while maximizing efficiency.

To utilize the CMAF option in PallyCon TNP service, please have a look at the [TNP Guide](#) & [API](#)

PallyCon's TNP service has gained widespread acclaim from industry experts since its launch in Q4 of 2022. The inclusion of CMAF support further strengthens PallyCon's position as a leading provider of comprehensive and user-friendly solutions for content protection and delivery.
